Variety of network access options including OC-3/STM-1, DS3/E3, NxT1/E1 IMA

Multiple chassis for Central Office, MTU/MDU and remote cabinet applications

ADC's Avidia DSL access concentrator removes the obstacles inherent in delivering reliable, dynamic high-speed digital communications. By delivering increased revenue opportunities, significant cost reduction and proven time-to-market benefits, Avidia gives you a distinct competitive advantage.

The Avidia System's multi-service access platform and ATM-based architecture allows you to deliver numerous high bandwidth applications- particularly Broadband Virtual Private Networking, Voice over DSL and Video on Demand- while simultaneously supporting email and Internet access.

Want to find out how you can be profitable at delivering high-speed DSL solutions? Call 800-WALKER-1 and ask about the ADC and Walker "Fast Track To DSL" bundled offerings today.
